EDUCATION

2021-2025

Bachelors in Computer Science

Fast University

Karachi

PAST PROJECTS

- Developed Library Management System
 - I employed object-oriented design for a modular, reusable codebase. Unit testing verified code quality, while security features safeguarded user data.
 - Designed a Car-Pooling System
 - The system employs web and mobile apps for universal access. Real-time ride updates enhance user experience, while cloud deployment ensures scalability and reliability.
 - Participated in Animation Contest
 - I collaborated with three students on an animation about AI's potential benefits and risks for a tech-themed contest. Our creative approach and technical prowess garnered positive feedback from impressed judges.
 - Designed Vending Machine in Science Project
 - I created a popular snack vending machine for a science fair, enhancing my skills in engineering, programming, and creative problem-solving.
 - Worked on Many Contents Writing Essays/Stories
 - I've crafted essays, stories, and blogs for diverse platforms, receiving praise for my engaging writing and storytelling. This experience honed my research, writing, and independent work skills, ensuring timely delivery.
 - Freelancing in Video Editing/Photoshop
 - I freelanced as a versatile video editor and photoshop artist. This cultivated creativity and problem-solving prowess, applicable across disciplines.
 - Using Electronics, Designed a Light System That is Regulated Using Sound Sensors
-
